New Products

Pivoting Edge Clamps

- Replaceable serrated gripper made of hardened tool steel
- · Clamping force provides both forward and downward force at the same time
- · Adjustable slotted base, secured with two Socket Head Cap Screws
- Can be converted to hydraulic operation

Heavy-Duty Spring Stops

- · Largest and strongest spring stop buttons we manufacture
- Mid-stroke spring force of 100 lbs. means no additional clamps are needed
- · Large contact face holds the workpiece together until project is complete

Hoist Eye 360®

- · 360 degree rotation after installation, aligning it with the pulling direction
- Can be used at full rated load capacity regardless of pulling angle from the bolt axis
- Available in standard sizes from 3/8-16 to 1"-8

Air Rest Buttons

- · Allows using pneumatic position control to detect proper workpiece loading
- Proper placement of workpiece will full retract plunger into the body
- Can be read using a pressure sensor which can be tied into PLC or a control system

Captive Locating Screw

- Available in sizes from 1/4-20 to 1/2-13 and metric sizes from M6 to M12 with screw lengths from 1 1/4" to 3" or 30 mm to 75 mm
- · Can be used to simply clamp a workpiece or used in locating and clamping
- When fully retracted it will prevent removal through spring force exerted from the bushing spring clip
