Carr Lane Manufacturing Achieves ISO 14001:2015 Certification for Environmental Management

St. Louis, Missouri – April 22, 2025 – Carr Lane Manufacturing Co., a leading provider of tooling components and industrial parts, proudly announces its certification to ISO 14001:2015, the internationally recognized standard for environmental management systems (EMS). This achievement reflects the company's ongoing commitment to sustainability and responsible manufacturing practices.

Issued by BSI (British Standards Institution), the ISO 14001:2015 certification confirms that Carr Lane's Environmental Management System meets rigorous global standards for managing environmental responsibilities in a systematic and sustainable manner. The certification scope includes the design and manufacture of tooling components for key industries such as aerospace, agriculture, automation, welding & fabrication, automotive, and quick-change systems.

The certification, issued April 10, 2025, covers both Carr Lane's headquarters in St. Louis, Missouri, and its manufacturing facility in Elgin, Texas.

"We are incredibly proud to achieve ISO 14001:2015 certification," said Mete Naz, Director of Quality Assurance "This milestone reinforces our dedication to reducing our environmental impact while delivering the high-quality products our customers expect."

ISO 14001:2015 is the leading environmental management standard developed by the International Organization for Standardization (ISO). It provides a framework for organizations to enhance environmental performance through more efficient resource use, waste reduction, and proactive risk management.

Carr Lane Manufacturing also holds ISO 9001:2015 certification, demonstrating its long-standing commitment to quality management systems and continuous improvement.

For more information about Carr Lane Mfg. visit Carrlane.com

Carr Lane Manufacturing is recognized as a world leader for standard tooling components and industrial parts used by virtually every industry around the globe.

Known primarily for jig & fixture tooling components, Carr Lane Manufacturing offers more than 100,000 industrial parts including quick change tooling plates & accessories, hoist rings, toggle clamps, handles, knobs, ball & spring plungers, threaded inserts, clamp straps, drill bushings, alignment pins, fixture bases, & power workholding devices.

Carr Lane Manufacturing is proud to manufacture & sell American-made fixture components, with most of our fixture fabrication completed at two American plants located in St. Louis, MO, and Austin, TX.

Our Promise of Quality

To be the world's preferred source of tooling components by continuously improving products, processes, and services to exceed our customers' expectations while fostering a culture of integrity and respect.
